

Safety Check of Shutter

IMADA force gauges can be used to check the safety of indoor / outdoor shutter, fire shutter or fire door. The force gauges measure the load needed to open / close shutters and doors, and you can see if the load is appropriate to operate.

Products: FB series, PS series, DS2 series and so on

Measurement: Measure the load to open / close shutters with large hook, Y hook or other attachments.

Example: Shutter closing test

Model: Standard mechanical force gauge PS-200N, Y hook S-8
