
Tape Grip/GC-60,100

Optimal attachment for tension test
of tape-like test piece

[Application]

- It is installed to Imada's force gauge for tension test of tape-like test piece.
- The grip is best suited for tension test of rubber, films, or test materials which become deformed or thinned on the testing process.

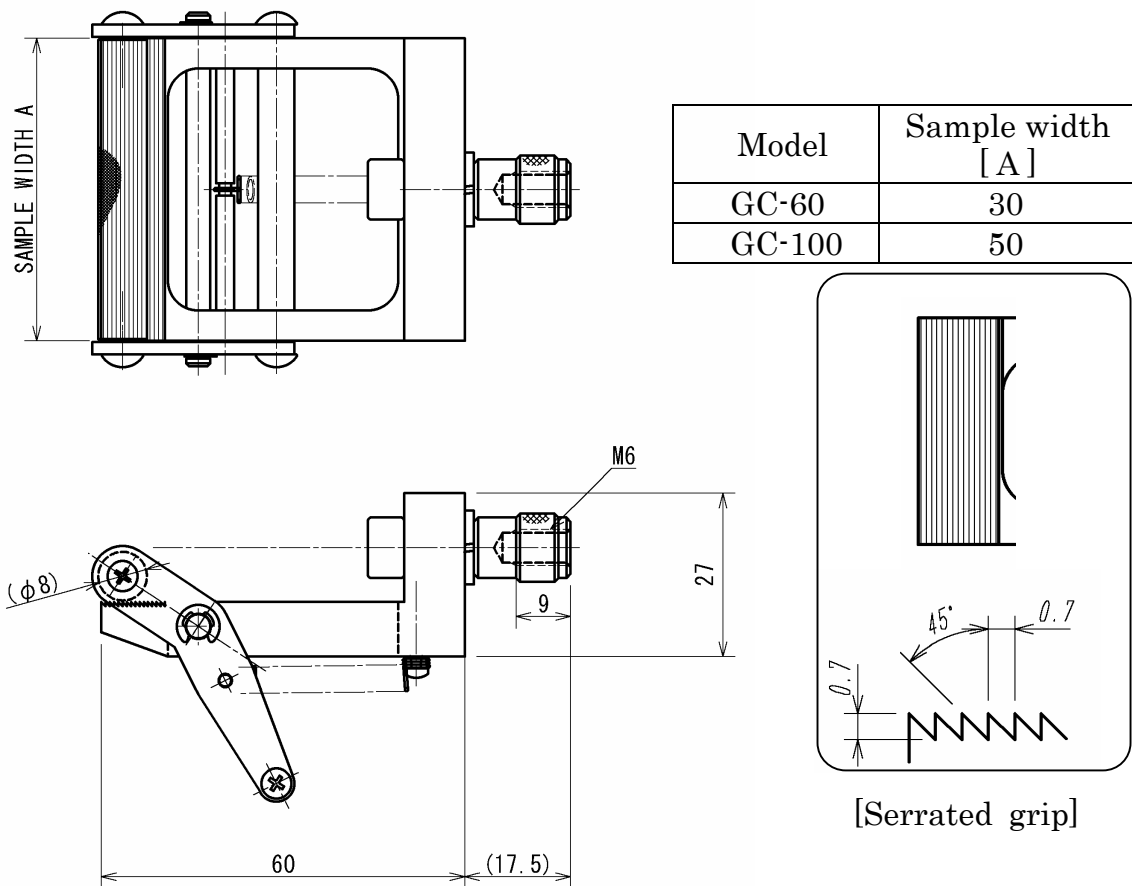

[Features]

- As the more tensile force is applied to the grip, the more clamping force is obtained.

[Specifications]

	GC-60	GC-100
Sample width [A]	Max.30 mm	Max.50 mm
Sample thickness	Max.2 mm	
Maximum Capacity	500N	
Mounting screw	M6 P1	
Dimension	W(79)×D(39)×H(51)	W(79)×D(59)×H(51)
Weight	Approx. 158 g	Approx. 300 g
The recommended force gauge	PS/FB/DPS/DPZ series 19.8N to 500N	PS/FB/DPS/DPZ series 49N to 500N

[Dimensional drawing]

[Precautions]

The tape grip can not grip particular material or shape.
 Combining with Imada's test stand, more stable measuring becomes possible.
