* Refer to specifications of each product for details.

* Product configuration varies depending on the shape and characteristic of the sample, and measurement conditions.

* The recommended capacity of force gauge varies depending on the expected force to be loaded.

*1 Depends on the height of the sample, long stroke version (-L) is necessary. Consider it when selecting test stand.

*2 If the sample contents are expected to spill, PTW-10IN is recommended to use as a tray.

*3 The speed range change (-V600) is required for JIS standard measurement.

Mountable Force Gauge	
DST/DSV series	ZTS/ZTA series
Digital force gauge with excellent cost-performance capable to manage data with PC.	Digital force gauge with high precision, featuring high sampling rate and a variety of useful functions.
	

* Refer to specifications of the individual product for details.
* Select suitable force gauge to correspond with the mounting screws of attachment.
